

Bringing your best to supervision.

A one-day practical workshop for both Supervisors and Supervisees.

This workshop explores how both supervisors and supervisees provide input towards key processes in supervision. The topics addressed in this workshop are: silence in supervision, triggers in supervision, self-reflection in supervision and preparation for supervision.

Additionally, knowing how to enquire without asking questions in session is a necessary tool for both supervisors & supervisees. Participants will be invited to reflect, practice & challenge their supervisory practices and participation through individual and group exercises, case studies and discussion.

Self-reflection and practice sessions will take you on a journey of self-discovery regarding who you are and the roles you enact in supervision.

Learning objectives of this workshop:

1. Recognise the need for and engage with silence in supervision.
2. Identify and manage emotional triggers in supervision.
3. Allow for self-reflection in supervision.
4. Preparing well for supervision.
5. Apply questioning techniques without actually asking questions.
